Exploded View

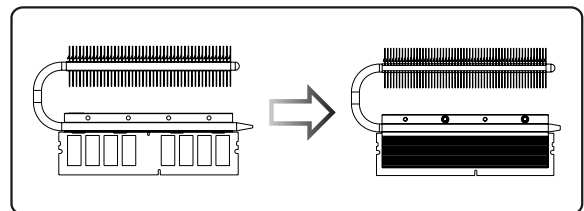

Installation

- Loosen the screws (C) on each side of heatsink by using hexagon spanner (F) and separate the heatpipe module (A) and heatsink (B).

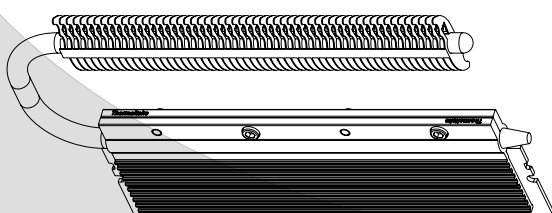

- Paste the thermal pad (D) onto each side of memory module.
 - For single sided memory module, please use thick thermal pad.
 - For double sided memory module, please use thin thermal pad.

- Apply a thin layer of thermal grease (E) on the heatpipe, and secure the heatsink (B), heatpipe module (A) on to the RAM. (See Complete View)

Completed View

Note: Angle for the Heatpipe module is adjustable, You may adjust it to the most suitable angle to avoid any possible interference.
